Aluminum Composite Panel Protection Film

This film is used by the aluminum-plastic panel industry. It is a layer of plastic film attached to the surface of the aluminum-plastic panel. The purpose is to protect the produced aluminum-plastic panel from damage during handling, transportation and installation. Therefore, the surface of the aluminum-plastic panel is as clean as new, and the decorative effect should be achieved.

Aluminum Composite Panel Protection Film is your best choice for easy job and perfect protection

- Easy Application, easy removal
- Will not creep and wrinkle after application, stick to the protected surface well
- without leaving adhesive residue after peeling off
- With UV inhibitor can stand long term outdoor use for 6 months
- No lifting or breaks from cutting, bending, drawing or roll-forming and possess superior dustproof properties.

Aluminum Composite Panel protection Film is available to distributors at distributor pricing. Please contact us for further information.

Common Thickness: 60microns, 70microns, 80microns, etc. Printability: 1-3 colors with customized logo.

Roll size: 1250mm x 1000m, 1240mm*500m, 1520mm*1000m, or others as your requirement
