HVAC Duct Protection Film

HVAC Duct protection film is a self-adhering, high puncture resistance plastic film, which can be used on opening duct in construction as a temporary closure protection. Duct Cover Shield provides temporary closures on open ductwork and prevents construction dust and debris from entering the duct work system, significantly reducing wipe down time and cost. The self-adhering protective film with a very high adhesion for all types of ductwork. With this film, there is no need to use tape for bonding and strapping. Can be used easily and remove without any residue.

Blue/Clear Polyethylene Plastic Vent Plastic Film is your best choice for easy job and perfect protection

- Removable:Can be removed without leaving any residue
- Soft:Product remains intact over bends and curved surfaces
- Durable:High resistance to tears, it can prevents from tears and punctures.
- Roll sizes ranging from 18" to 48" wide are available so that you can protect any type of ductwork quickly and easily.

Duct film is available to distributors at distributor pricing. Please contact us for further information.

Normal thickness:40microns,50microns,75microns, etc.

Roll size:609mmx60m, 533mmx60m,609mmx152m, etc.
