Mirror Safety Backing Film-CATI (PE material)

Mirror Safety Backing Film-CATI is a plain polyethylene film with high adhesion designed for mirrors to keep fragments together and reduce the risks of injury when mirrors are broken accidentally. Through high adhesion, the high performance pressure-sensitive acrylic adhesive make it easy to unwind and tight bond to mirror backing.

Mirror Safety Backing Film is your best choice for easy job and perfect protection

- Easy Application, easy removal
- Safety film used for mirror back surface
- highly strong film with good puncture resistance
- reduces injury from broken glasses for humans when the glasses are fragiled.

Window glass film is available to distributors at distributor pricing. Please contact us for further information.
