## Multi Surface Protection Film

Multi Surface Protection Film is a regular wound or reverse wound, polyethylene film coated with acrylic pressure sensitive adhesive. It is a tough, durable film which is great for protecting hard floors, wooden floor, counter tops, ceramic tile, marbles and more. Can run with sticky side in or out as per requested. It is convenient and economical to use, also can be removed without any residue.

**Multi Surface Protection Film is your best choice for easy job and perfect protection**

- Easy Application, easy removal
- Suitable to commercial and home usage
- without leaving adhesive residue after peeling off
- protect against scratch, dirt, stains, paints, etc, keeping clean after removal
- Will not creep and wrinkle after application, stick to the protected surface well

**Multi Surface Protection Film is available to distributors at distributor pricing.  
Please contact us for further information.**
